DEFOAMER**

Clearly's Defoamer is a water dispersible anti-foaming agent designed for the prevention or suppression of foam formation in spray tank solutions during agitation. It is specially formulated for compatibility with most of the pesticides commonly used for the turf and ornamental industry. Clearly's Defoamer is a nonionic formulation, offering superior uniformity and compatibility in the spray tank.

Rates: 1 pt. (16 fl. oz.) per 100 gal. of spray volume (rate may be adjusted depending upon the foaming ability of the materials used in the tank solution).

TURF MARK BLUE LIQUID

Turf Mark takes the guesswork out of spraying. It's the proven and professional way to apply liquid pesticides and fertilizers. Turf Mark dissipates quickly in either wet or dry weather, making it the ideal temporary spray colorant. The distinctive blue color shows you exactly where you've sprayed, preventing skips and overlaps and helping to pinpoint drift.

Rates: Rates may be adjusted up or down for more or less intense color. See label for specific rates.

Application: Herbicide and Fertilizer application additive.
